

# SmartSafe AC Product Compatibility List

**Catalog No: KT-EMRG-LED-12-1200-AC**

Check back often for updates. If the LED lamps, light engines, downlights, and fixtures you are looking for is not on this list, please contact us, and we will make every effort to evaluate compatibility.

**Note: Testing is based on (1) LED load per EM backup**

 ☐ No

(continued on next page)

- Compatibility is determined when (a.) LED load illuminates under emergency mode without any undesirable flashing, flickering, or audible noise (b.) LED load stays illuminated for a full 90 minutes (c.) Smart Safe AC Emergency backup electrical output characteristics are stable and within designed operating specifications.
- Keystone Smartsafe AC Product Compatibility does not make any guarantees of electrical performance or lifetime for products that are not manufactured by Keystone.
- Compatibility testing is performed with specific product date codes and is for reference only. Please contact Keystone for more information on date code of products tested.
- Product compatibility testing is not related to UL 924 testing. Ultimate suitability for SmartSafe AC Emergency backup in an end use application is to be determined by AHJ for a jobsite.
- Keystone Smart Safe AC is not recommended for use with dimmers. Use of Keystone Smart Safe AC with dimmers voids any warranty on the Keystone Smart Safe AC product.
- All data subject to change.
