## **SmartDrive T8 LED Tube Ballast Compatibility List**

## KT-LED15T8-48G-8XX-S /G2

Check back often for updates. If the ballast you are looking for is not on this list, please contact us, and we will make every effort to evaluate compatibility.

Note: Reduced Lamp Load is defined as operating one less lamp than the ballast is rated for.

## 4' Lamps, 120-277V Input

| Ballast Description   |                          |          |          |         |            |         | Nominal Lamp Load |               | Reduced Lamp Load |  |

SmartDrive LED Lamp Compatibility is determined when the ballast turns on the LED lamp and the electrical characteristics of the LED lamp are stable and within designed operating specifications.
 Keystone SmartDrive LED Lamp Compatibility does not make any guarantees of electrical performance or lifetime for ballasts that are not manufactured by Keystone.
 Ballast Compatibility testing is performed with specific date codes. Please contact Keystone for more information on date code of ballasts tested.
 2' and 3' Lamps may experience flickering or buzzing noise when input voltage is greater than 277V.
 All data subject to change.

<sup>1.</sup> SmartDrive LED Lamp Compatibility is determined when the ballast turns on the LED lamp and the electrical characteristics of the LED lamp are stable and within designed operating specifications.

Keystone SmartDrive LED Lamp Compatibility does not make any guarantees of electrical performance or lifetime for ballasts that are not manufactured by Keystone.
 Ballast Compatibility testing is performed with specific date codes. Please contact Keystone for more information on date code of ballasts tested.
 2' and 3' Lamps may experience flickering or buzzing noise when input voltage is greater than 277V.

- 1. SmartDrive LED Lamp Compatibility is determined when the ballast turns on the LED lamp and the electrical characteristics of the LED lamp are stable and within designed operating specifications.
- 2. Keystone SmartDrive LED Lamp Compatibility does not make any guarantees of electrical performance or lifetime for ballasts that are not manufactured by Keystone.
- 3. Ballast Compatibility testing is performed with specific date codes. Please contact Keystone for more information on date code of ballasts tested. 4. 2' and 3' Lamps may experience flickering or buzzing noise when input voltage is greater than 277V.
- 5. All data subject to change.
