

LINTA

LINEAR ARCHITECTURAL FIXTURES

Distinctive. Elegant. Simple.

SINCE 1945
KEYSTONE
LIGHT MADE EASY®

JUNE 2025

Beautifully simple

Linta: Architectural lighting from Keystone.

A linear direct/indirect fixture that's elegant, modern, and versatile. A fixture that's attuned to your style—and your project budget.

Linta fixtures link seamlessly with simple, intuitive connections. Join them together to form straight lines or angled figures. Easily transition the ambience of your space with field-adjustable uplighting and downlighting, and select the right color temperature and lumen output for any room with the touch of a switch.

The length and look is up to your imagination.

It's easy to specify, easy to order, and easy to install. And, in particular, easy to design the light you want in your space.

That's Linta by Keystone. Light Made Easy®.

Simple connections

Linta is available in four lengths—2 feet, 3 feet, 4 feet, and 8 feet—as well as X shapes, T shapes, and L shapes.

Installation couldn't be simpler. The provided toolless brackets feature a snap-and-lock design that allows you to link fixtures seamlessly and firmly, and with pre-installed connectors, you can hook up power and dimming in seconds.

For an even smoother look, an optional 32-foot rolled polycarbonate lens can be cut to length to minimize seams on multiple fixture runs.

Endless configurations and possibilities

Create singular designs with distinctively shaped fixtures. Each features uniform lighting that eliminates corner hot spots. They also offer the same simple connections as our linear fixture.

L Fixture

X Fixture

T Fixture

Versatile mounting options

Linta offers almost unlimited mounting possibilities. Suspend from the ceiling with the included cables, or easily add mounting hardware to any fixture to create a variety of lighting design solutions.

Hang as a pendant . . .

Every Linta box includes two cable styles for pendant for pendant mounting from any ceiling:

- Standard 15' aircraft cable with tapped base coupler hardware
- Looped-end cables with adjustable "Y" grippers

A wide variety of canopy cover feed and non-feed kits are also available to suit all potential suspension installation needs.

. . . or, add a kit and mount on a wall or ceiling

Quickly add a mounting kit to any fixture length and expand your mounting options. Linta can be mounted flush against the ceiling, in the plenum, or on a wall.

Watch the video

It's 45 fixtures in just one elegant design.

Effortless illumination

With Linta, you get the power of many fixtures in one elegant design.

- Direct (downlighting) and indirect (uplighting) lighting settings are as easy as flicking a switch. Choose between:
 - 100% direct
 - 50% direct / 50% indirect
 - 70% direct / 30% indirect
- Keystone Power Select technology with 3 selectable power outputs
- Keystone Color Select with 5 selectable CCT:
 - 2700K, 3000K, 3500K, 4000K, and 5000K.

Integrated
Emergency
Backup

Advanced customization

For emergency lighting needs, Linta is designed to work with Keystone SmartSafe emergency battery backups.

Further customize your Linta installation with Keystone SmartLoop wireless controls. Simply add the available custom-designed end cap and fine-tune the light beyond the selectable switches.

Self-Service Lighting Layout Tool

Keystone now offers an online self-service tool to help you take the next step in bringing your project to life.

Our easy-to-use application instantly renders lighting layouts for simple space types. Simply add room size and select your fixture, and the application helps determine how many fixtures you need and what types of lamps are best for your applications to save the maximum amount of energy, all within budget.

As always, we continue to offer our complimentary lighting layout services and are happy to consult and assist whenever needed.
