

SmartLoop for iPad®

OCTOBER 2025

FASTER SETUP. SMARTER CONTROL.

Keystone's SmartLoop is the easiest wireless lighting control on the market: powerful enough to run a space with multiple zones, but simple enough to program in minutes with your smart device.

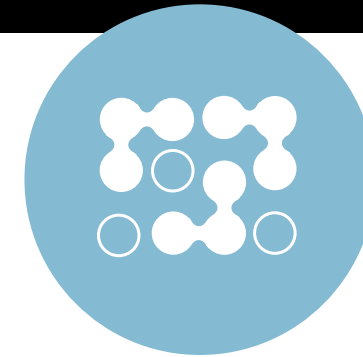

The latest SmartLoop app update, optimized for iPad, streamlines commissioning with new tools designed to save time and labor costs, reduce complexity, and simplify large-scale projects. Making commissioning faster, smarter, and more reliable—That's Light Made Easy®.

Flashlight Commissioning

Keystone's fast commissioning process allows you to turn off Bluetooth to all fixtures. Then—by shining a pulsing flashlight accessory at the Bluetooth receiver/transmitters—enables it for individual fixtures, all from the ground level.

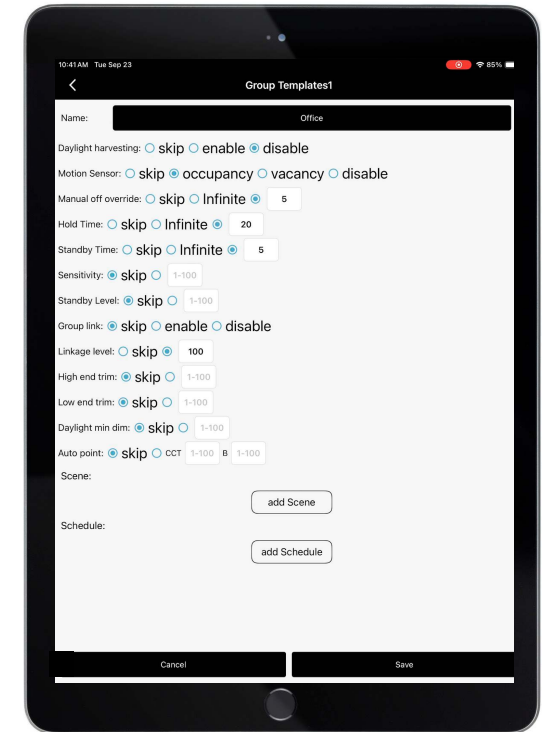

Quick-Add & Name

- Advanced technology to enable/disable Bluetooth
- Quickly add fixtures to a Region with auto naming
- Customize to user preference

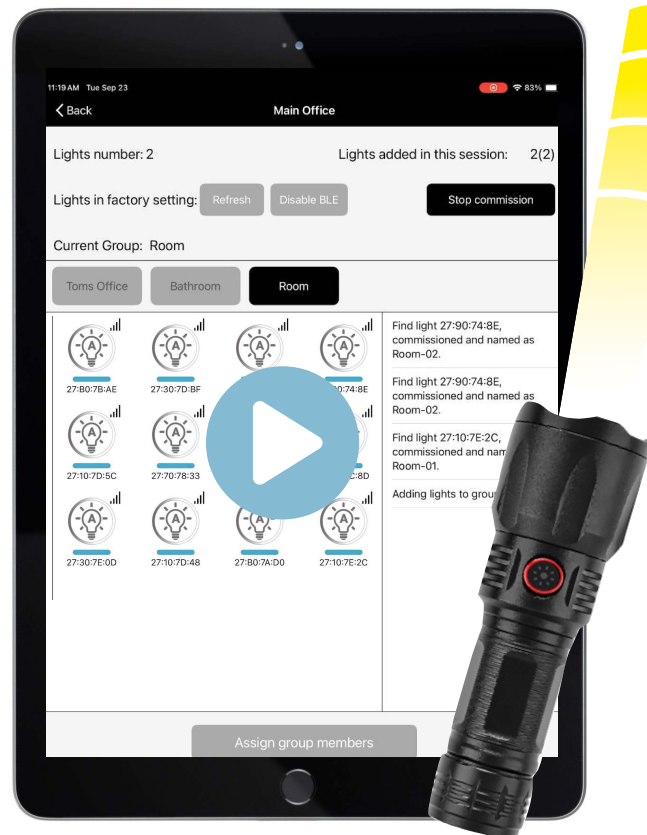

Devices Tab

- Simplifies management of switches, sensors, and tools
- Easy commission, all from a single location

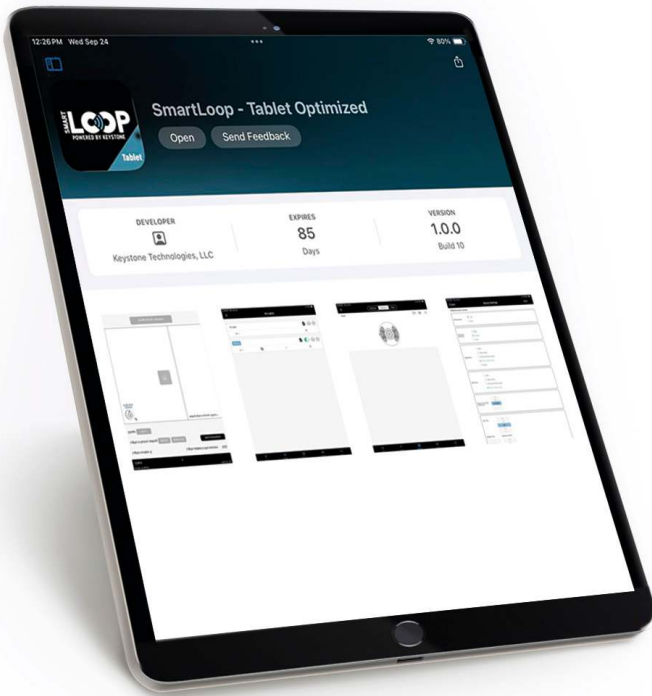

Group Templates

- Save and share pre-set configurations
- Quickly apply settings across multiple Regions and Groups
- Saves time on site for large jobs

DOWNLOAD THE IPAD UPDATE!

Key features:

- **Quick-Add and Name with PulseLINK:**
Automatically add and label devices with your personal naming conventions
- **Expanded Devices Tab:**
Easily commission switches, standalone sensors, and tools from one place
- **Group Templates:**
Save and share pre-set configurations to quickly apply settings across your lighting
